

AZDEN SMX-100

The SMX-100 is a high quality stereo shotgun microphone. Designed for broadcasters, videographers and audio professionals, the SMX-100 offers wide frequency response in a compact, lightweight camera-mount design. The M-S pick-up configuration means recorded signals are stereo and mono compatible making the SMX-100 an excellent choice for all video-based audio applications. External phantom power between 11 and 52 VDC is required to operate the microphone, which terminates with a hard-wired 5 pin XLR connector. The SMX-100 is 8.5" long and comes complete with a custom carrying case, high density foam windscreen and shock-mount microphone holder.
