

4K HDR ENG Shoulder-Mount Camcorder

AJ-CX4000GJ

KEY FEATURES

- Newly-developed 4.4K sensor for high quality 4K (UHD) image recording with 2000 TV lines
- Large single-sensor internal expansion lens imaging system with interchangeable B4 mount
- HDR HLG support (compliant with BT.2100 & BT.2020)
- Newly-added HEVC 100Mbps codec for ENG (4K 4:2:0 10-bit)
- F10 (60 Hz)/F11 (50 Hz) sensitivity in High Sens. Mode

The AJ-CX4000 is the latest addition to the 4K camcorder 'CX Series', which has been introduced to support UHD content acquisition for newsgathering operations, to stream live events, and for sports and documentary capture.

The CX4000 features an interchangeable B4 lens mount and is equipped with a newly-developed 11MP MOS sensor with a horizontal resolution of 2000 TV lines. It is compatible with HDR capture, supporting both BT.2100 and BT.2020 colour space, in providing images high in sensitivity and low in noise.
