

VSN WEDIT

EDIT VIDEO IN AN EASY AND COLLABORATIVE WAY

VSN's web video editor, Wedit, an add-on feature of the VSNE Explorer platform, enhances collaborative work in Broadcast and Media environments and increases efficiency in media management and editing processes with heavy time constraints, such as news and live events' production.

OPIS

WEB TOOL

Developed in HTML5, Wedit is a fast and easy to use tool that allows users to make video cut editions for broadcast from VSNExplorer's own interface and without the need to switch to another Non-linear editing (NLE) system, in case no advanced editing work is required.

- Integrated and browser-friendly

VSNWedit has been 100% developed in HTML5 and is integrated with VSN Explorer and with VSN's NewsConnect web plugin.

- Quick & easy edition

Quick selection of video segments and sequences' cut editing via automatic generation of keyframes after every scene change and shortcuts.

- Efficient export

EDL files export and download for further editing on any NLE, such as Avid Media Composer, Final Cut Pro, Adobe Premiere, Vegas, etc.

- Advanced editing capabilities

Voiceover recording over timeline capabilities while previewing proxy video, cut list generation, proxy segments mark-in and mark-out with photogramic accuracy.

- Proxy file generation

Visualize a low resolution video while it is being ingested in the system, while simultaneously selecting, editing and consolidating fragments for delivery.

- Metadata cataloging

Advanced cataloging and search through metadata detected directly from the media (timecode, format, bitrate, copyright, user validation, speech-to-text, etc.) or pre-defined by the user.
