

VSNNNEWS TERMINAL

The Production view is actually the same playlist view as the one shown in the vsnnews playout, vsnairnews, user interface. Finally, the CG view is also restricted to news terminal and shows on the playlist all information relative to the graphic objects that may have been added to news events.

OPIS

To facilitate the reporters' editing tasks, the A/V editor can be accessed from the news items edit dialog. Vsnnews terminal does not feature ON AIR or Playout capabilities. Since playout tasks are the responsibility of the master room director only vsnnews playout includes these functionalities.
