DARK ENERGY PROFFESIONAL

The fastest, most precise image texture management software in the world for cinematic releases and archive restoration.

Cena: $0,00
Kategorie: Video, Rekonstrukcja obrazu

OPIS

RESTORE. OPTIMIZE. TEXTURE.

- High Quality Image Scaling (DE handles any size)
- Automatic Dustbusting, 80% hands-free without artifacts
- Best-in class denoise/degrain without image degradation
- Texture simulation to emulate any film stock or texture – No more film outs with the best looking film grain on market
- Homogenize the texture from many sources (film, various cameras, etc)
- Fully scalable render speeds – no limits

23.06.25

The fastest, most precise image texture management software in the world for cinematic releases and archive restoration.

Dark Energy Professional has been described as incredible, amazing and unequalled for image texture management by the most discerning eyes in the world.

Starting with an intuitive, real-time feedback GUI, users can immediately see the results of their adjustments without waiting for a render, without "hoping" the adjustments will be what they want.

While other platforms struggle with slow processing, Dark Energy Professional renders as fast as your workflow demands. Powered by NVIDIA Maximus Technology, Dark Energy Professional provides users 10-16 FPS of rendering for each Tesla GPU installed in your workstation.

Dark Energy Accelerator is Cinnafilm's batch/automated rendering tool that allows users to:

- Background render already completed projects while starting work on a new project
- Batch process complex folder structures based on pre-defined templates
- Combining complete control of image texture and incredible rendering speeds, Dark Energy Professional is the ultimate software for demanding users.
