Cena: $0,00
Kategorie: Audio, Procesory cyfrowe

OPIS

This plug-in offers unrivaled creative possibilities by virtue of a powerful combination of modulatable Harmonizer effects.

The re-imagined UI allows users to patch together any combination of 18 effect blocks, including the H3000 Function Generator with 19 waveshapes, in endless permutations.

The resulting sounds must be heard to be believed.

- Modular Effects Laboratory based on effect algorithms from the legendary H3000
- Capable of a wide range of effects from subtle sweetening such as Eventide’s signature Micropitch effect to total sonic annihilation
- Chock full of Over 500 presets, great for bringing a spark of inspiration to any project
- No dongle required

Over 100 new presets from:

- Alessandro Cortini (Nine Inch Nails)
- Chris Carter (Throbbing Gristle)
- Colin Newman (Wire)
- Damian Taylor (Bjork)
- Dave Darlington (Bass Hit Studios)
- Kerry Leva (EDM Producer)
- Richard Devine (Sound Designer)
- Scott Martin Gershin (Soundeluxe)
