OPIS

This unique and one-of-a-kind plugin will save you massive amounts of time when designing any sound effect and aims to inject more fun into the process. Perform your sfx libraries in real-time via a microphone, controller or instrument, quickly and easily add textures, replace any sound and discover inspirational new ways to maximise your sound design workflow.

Reformer Pro also utilises the world’s first Dynamic In put technology, taking procedural, sample-based audio processing to new heights and into previously unexplored territory.

The VST/AU/AAX plugin comes with the Krotos Bundle 1 Library for free. That’s over 3.8 GB of

high-fidelity sounds and a huge saving to get you started.
