ULTRAREVERB

Eventide®

UltraReverb brings you our best reverb effects from our most prestigious hardware products and combines these with full multi-effect capabilities all within a single plug-in. Create acoustically natural or other-worldly environments with 9 reverb algorithms including Plates, Halls, Chambers and Ambience. Our most comprehensive reverb plug-in, UltraReverb emulates every aspect of the sound of a real physical environment – from the complex early reflections, to the natural way in which the echo density increases with time, to the smooth Gaussian decay of the reverb tail. Control the structure of the reverb by fine-tuning the controls - including PreDelay, Decay, Room Size, Diffusion, and Pre/Post EQ.
