Key Features

- MIRACUBE MFX 3D Engine :
  MIRACUBE MFX3D Engine supports Frame Sequential, Side by Side, Top & Bottom and Interlaced formats. The MIRACUBE MFX Engine is built in to provide a powerful & active 3D display. No requirement for extra hardware or software.
- World’s largest 3-D solution line-ups :
  Miracube has a complete 3D solution for a variety of industries. Miracube has 3D monitors, 3D filming equipment and 3D projection systems.
- Switchable between 2d and 3d :
  All of our monitors can be switched between 2D and 3D simply by pushing a button.A second 2D monitor becomes obsolete. Just use the 3D mode for your stereoscopic 3D content, and switch back to 2D for all your normal 2D applications.
- High resolution and wide viewing angles :
  Our monitors offer high resolution images - also in 3D! And a unique filter technology allows for extra wide viewing angles for multiple viewers and comfortable viewing. Passive glasses let you enjoy also long viewing periods and eye-fatigue a thing of the past.
- Eco-technology AL case:
  The Recyclable aluminum case is environment-friendly
- A certified system for a global market :
  Our monitors have CE, FCC and MIC certifications. Every 3D monitor of ours complies with ROHS regulations

- Range of applications for our 3D display solutions
