ONTHEAIR CG

OnTheAir CG is a Character Generator application that can simultaneously work with a number of different animated graphics such as tickers, clocks, and animated image sequences as well as pictures and shapes. It can be integrated with OnTheAir Video or used in a standalone mode. Control of the application can be interactive (for example clicking on a button to start an animation) or done via playlists in OnTheAir Video.

This software is compatible with Blackmagic Design.
